

DISCOVER THE POWER OF POWER UP:

Charge your devices wherever you are!

Energy, always with you

Perfect for outdoor adventures, camping or as a reliable backup during blackouts in the home, they are also a valuable mate for home improvement projects and construction work.

Unexpected events are always around the corner, and being prepared is essential. That's why we have created tools that ensure you are always ready, wherever you are, without relying on a power grid.

POWER UP 650

Portable pure sine wave power station with lithium battery for charging or powering various types of devices. It is an independent source of energy in outdoor activities or in the absence of power supply and is equipped with several outputs (USB, 12V-DC, 230V-AC) for charging or powering electrical and electronic devices even simultaneously. It can be used as a starter for 12V vehicles.

The LCD display allows visualization of various information, even in dark or dimly lit environments, such as the battery charge percentage and estimated hours of operation depending on the active output; the watts absorbed by each output. The LED light (230 lumens) with 5 operating modes makes it a source of illumination when needed. Compact and transportable wherever its use is needed. Safe, it implements numerous protections (overcurrent, short circuit, overvoltage, overdischarge, overtemperature). Equipped with cable with cigarette lighter plug and power supply unit.

POWER UP 1300

Portable pure sine wave power station with lithium battery for charging or powering various types of devices. It is an independent source of energy in outdoor activities or in the absence of power supply and is equipped with several outputs (USB, 12V-DC, 230V-AC) for charging or powering electrical and electronic devices even simultaneously. It can be used as a starter for 12V vehicles.

The LCD display allows visualization of various information, even in dark or dimly lit environments, such as the battery charge percentage and estimated hours of operation depending on the active output; the watts absorbed by each output. The LED light (230 lumens) with 5 operating modes makes it a source of illumination when needed.

Compact and transportable wherever its use is needed. Safe, it implements numerous protections (overcurrent, short circuit, overvoltage, overload, overdischarge, overtemperature).

Equipped with cable with cigarette lighter plug and power supply unit.

ALWAYS CHARGED WHEREVER YOU GO

A day outdoors, a weekend camping, or a domestic emergency. With Power Up power stations, you will always have a reliable and powerful energy source at your disposal.

These portable devices, equipped with the latest generation batteries, can power any electrical or electronic device: from smartphones to laptops, from lamps to small household appliances.

- Unmatched autonomy: Power Up power stations guarantee hours and hours of continuous power supply.
- Versatility: With multiple output ports (USB, 230V AC, 12V DC), you can connect and charge multiple devices simultaneously.
- Sustainability: Power Up can also be recharged using solar energy.
